05/22/2023 Todd: Dr. Eldredge,

I reviewed every CIMT I have ever ordered over the weekend to try to find patterns and increase my learning. I have questions regarding the following studies. Unless otherwise noted, my question for each is, "Is this a real plaque since it is only in one location?".

Sebastian McLeod 9/14/1972 - CIMT 10/27/2022. Plaque in two locations (both femoral). Inflammation. Are these real plaques? If so, would you order both carotid and femoral to monitor this patient?
